@themutantshrimp • 2 weeks ago

To this day I still don't quite know what TodePond is actually doing

@filbist • 1 month ago

Even watching todepond for so long, I have no idea what's going on,

@rashs6302 • 3 years ago

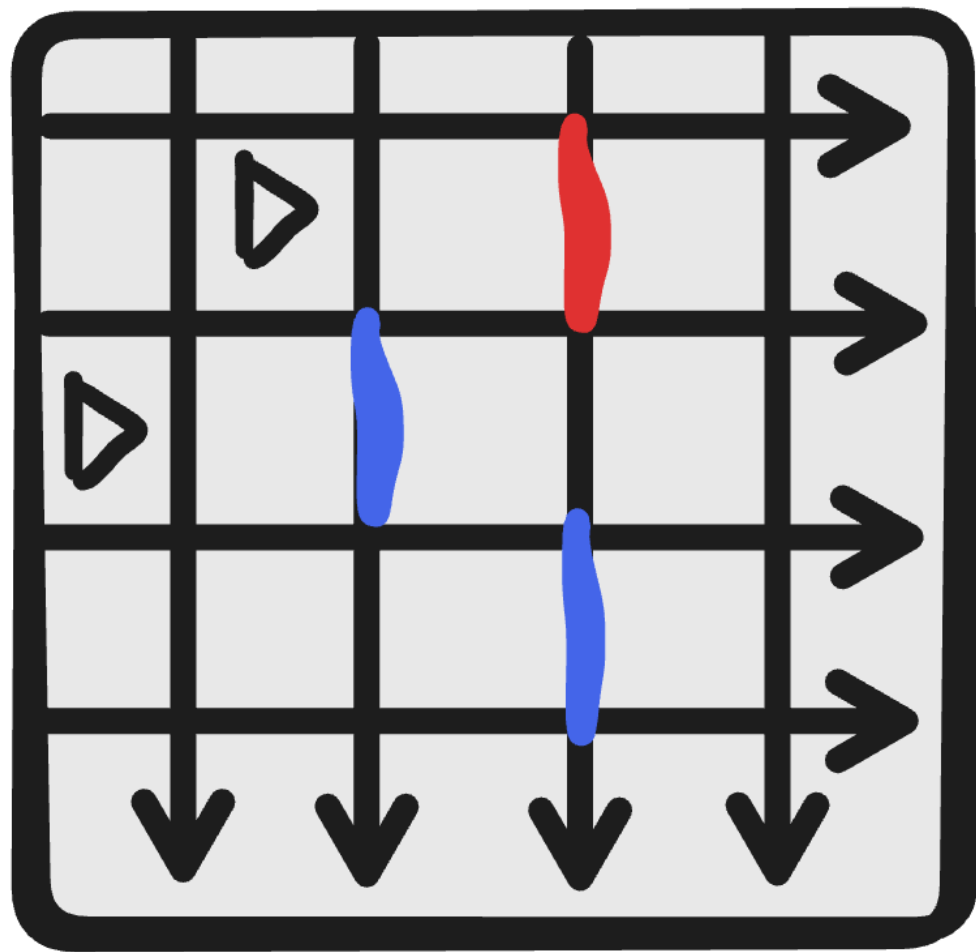

Can someone explain what is this

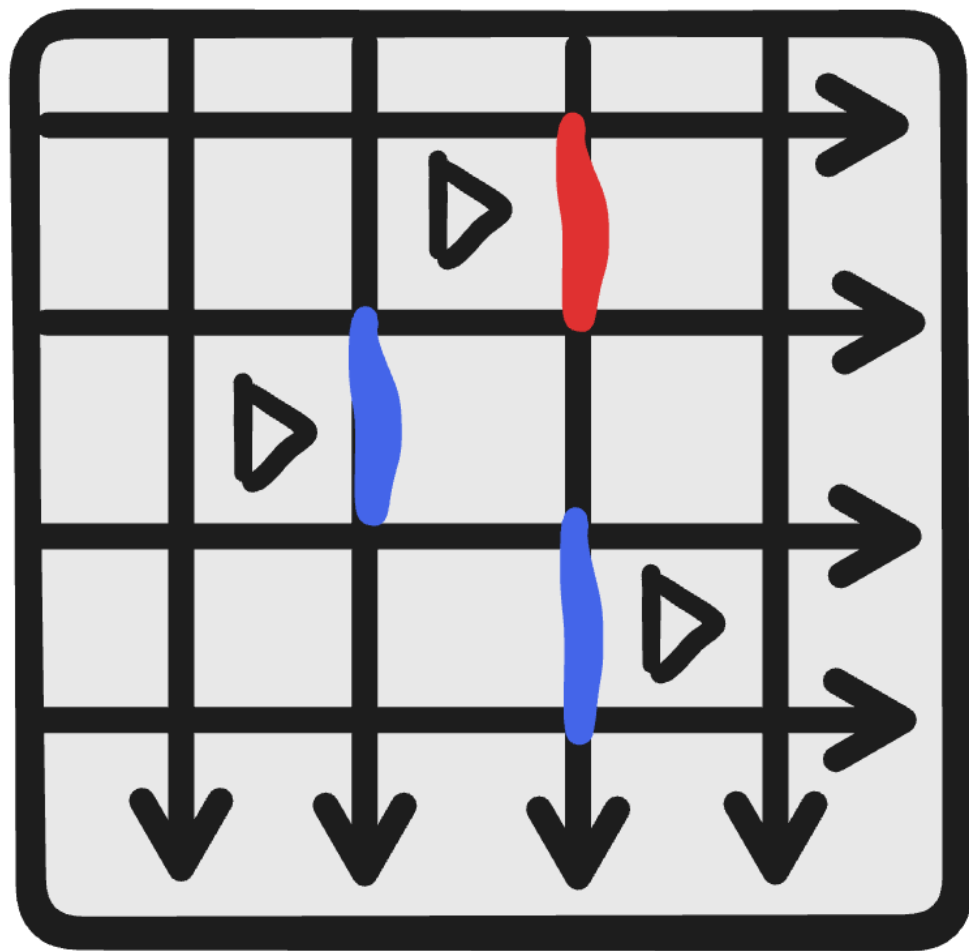

5 years ago

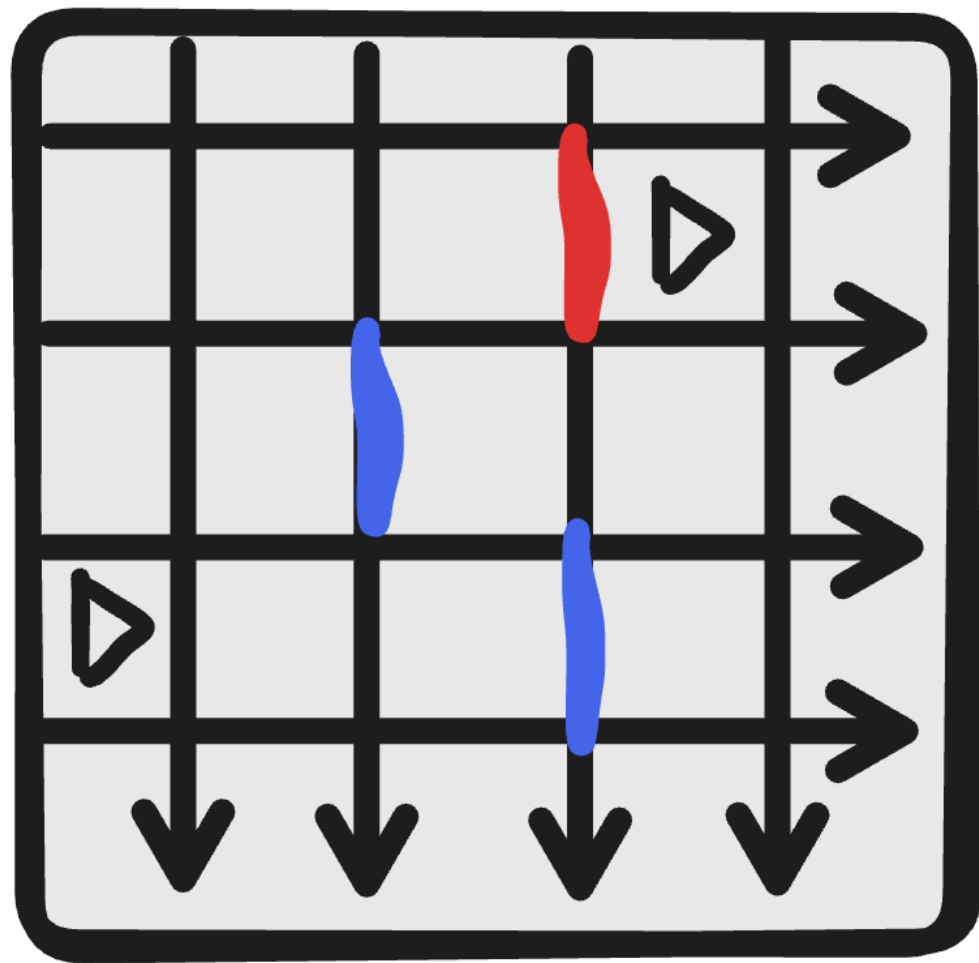

Arroost

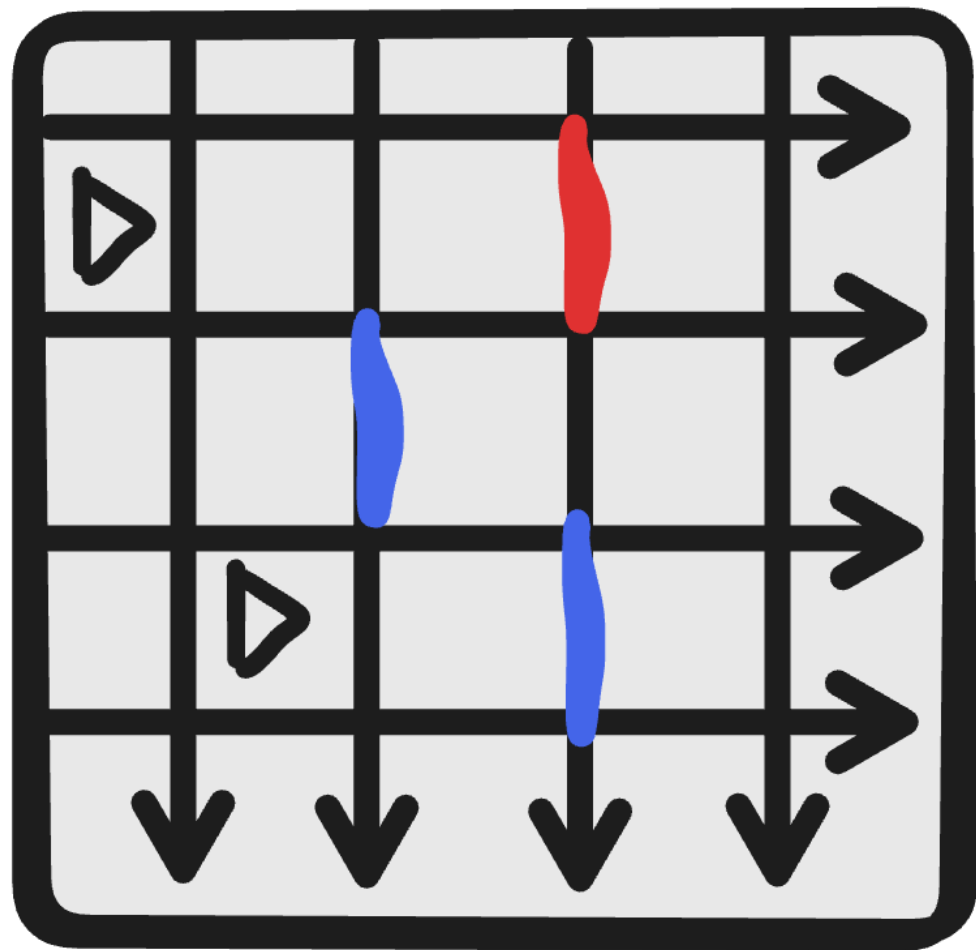

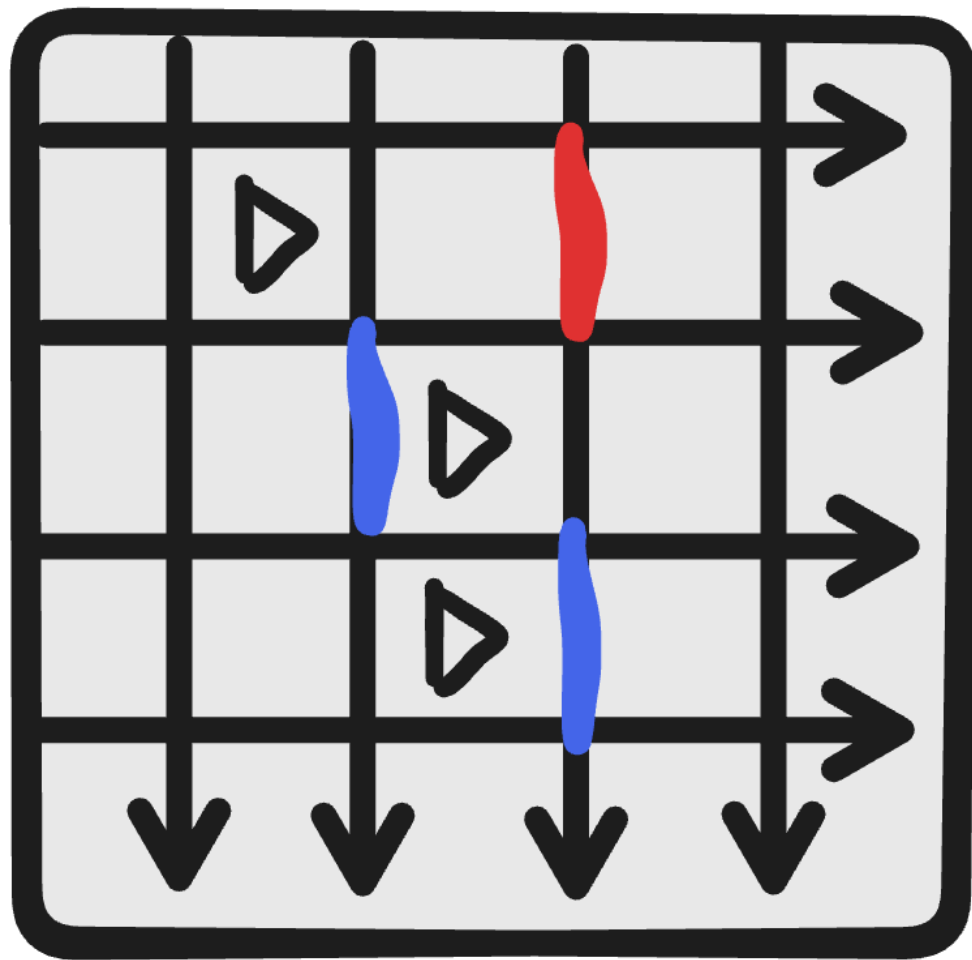

Arroost is a ridiculous music-making tool.

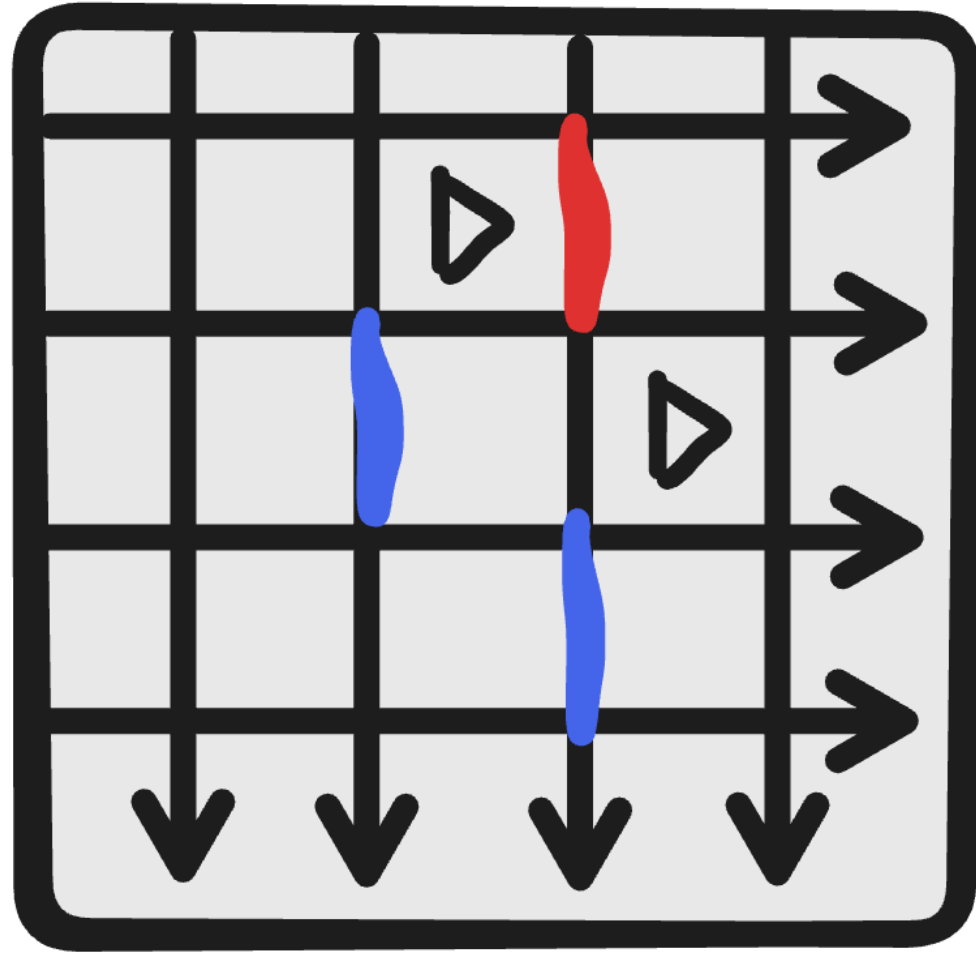

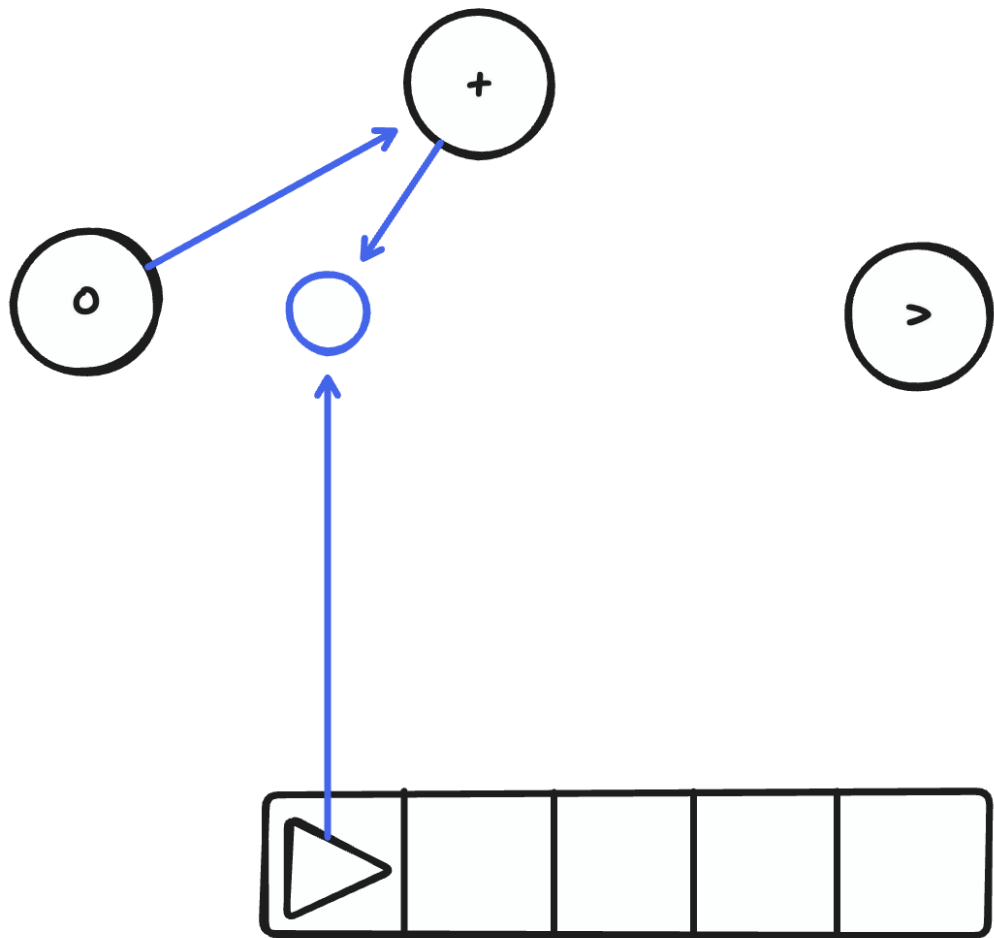

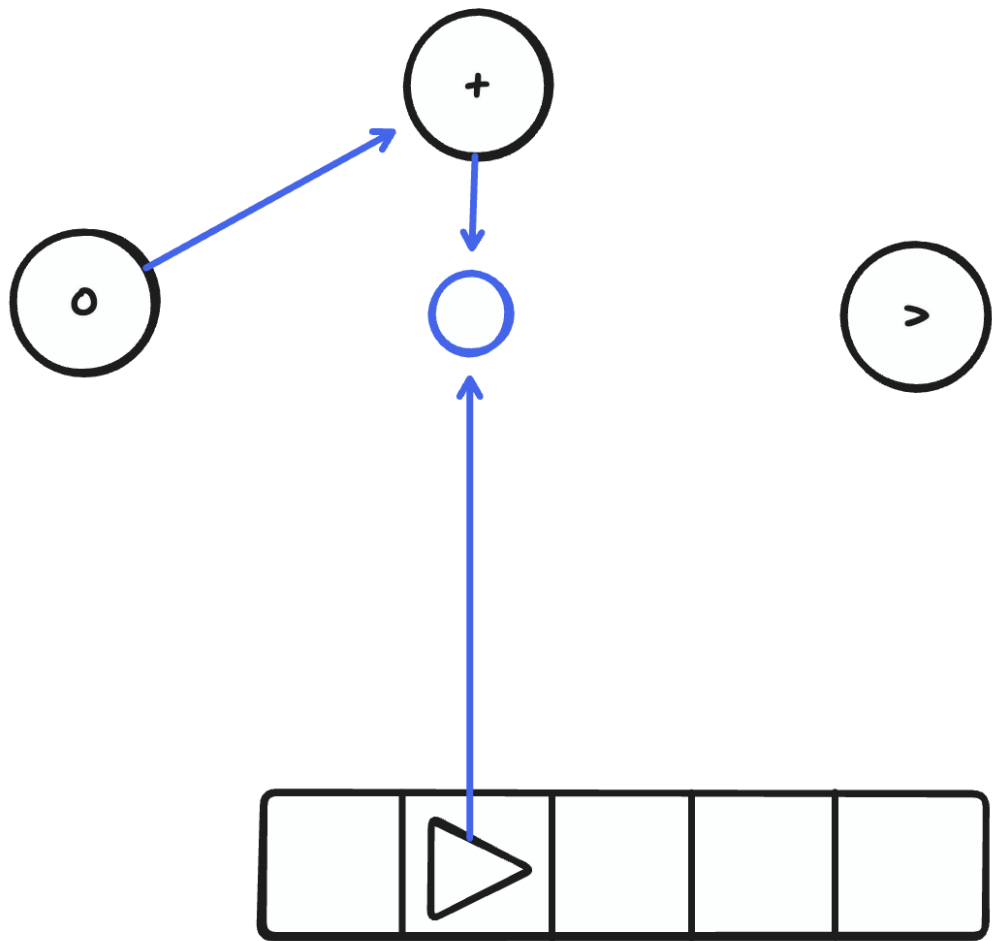

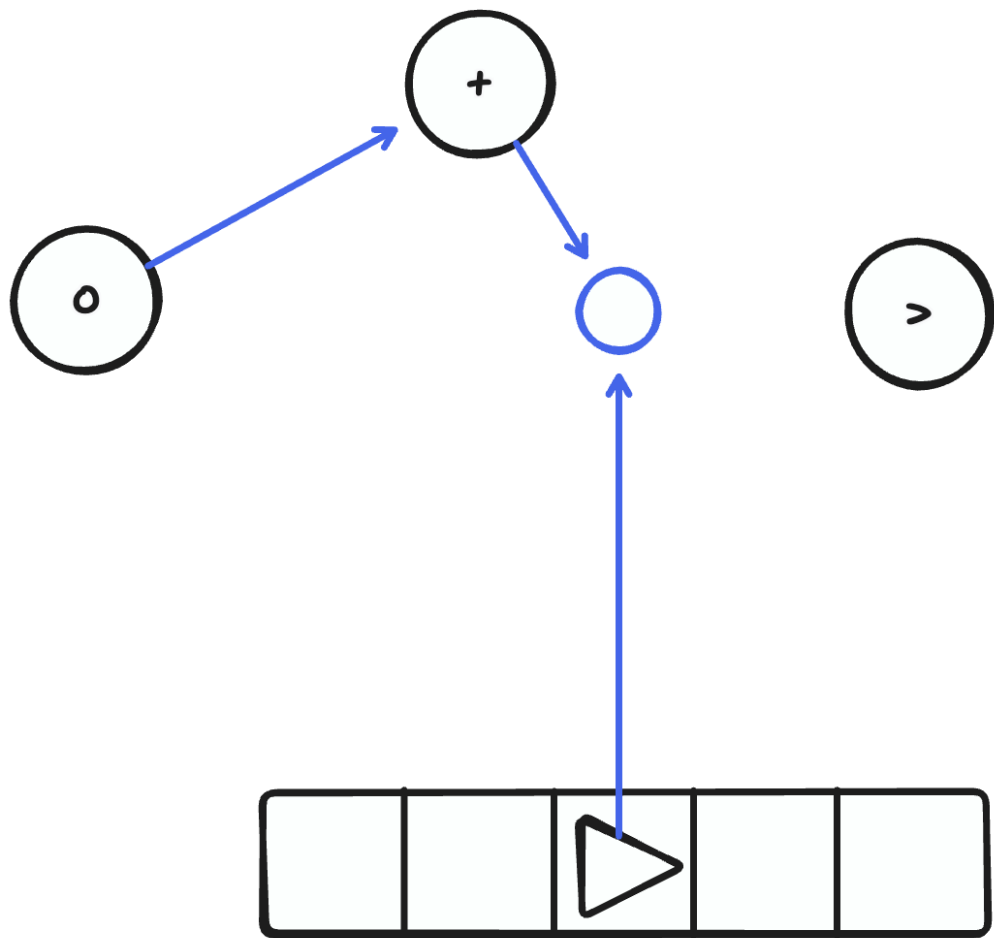

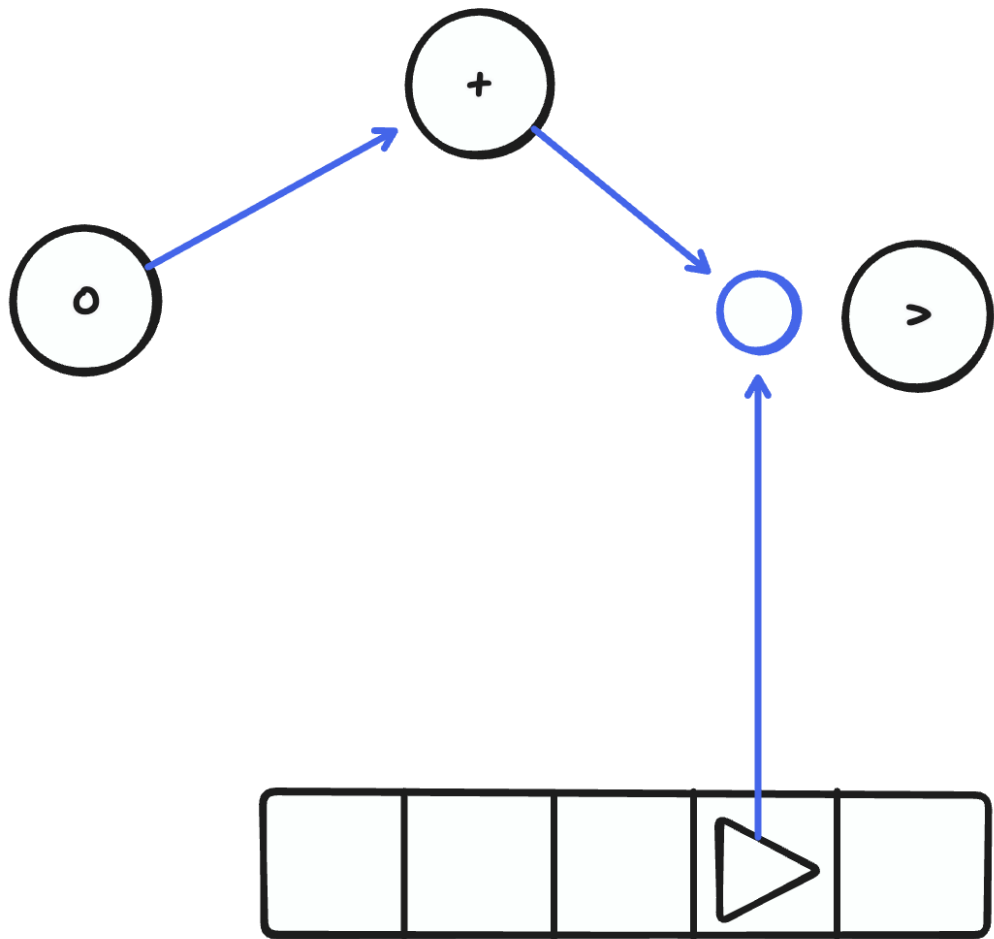

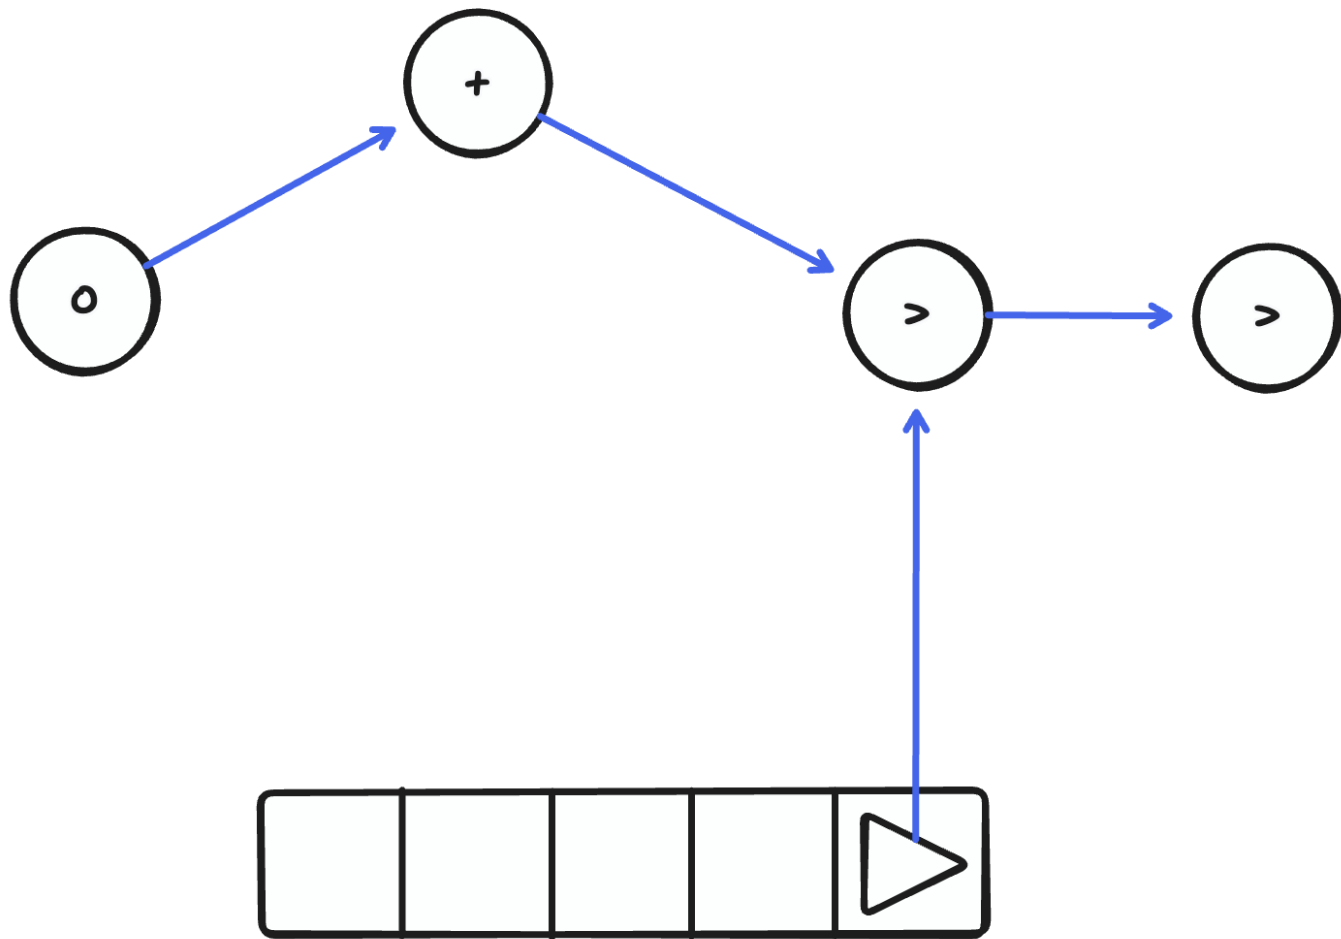

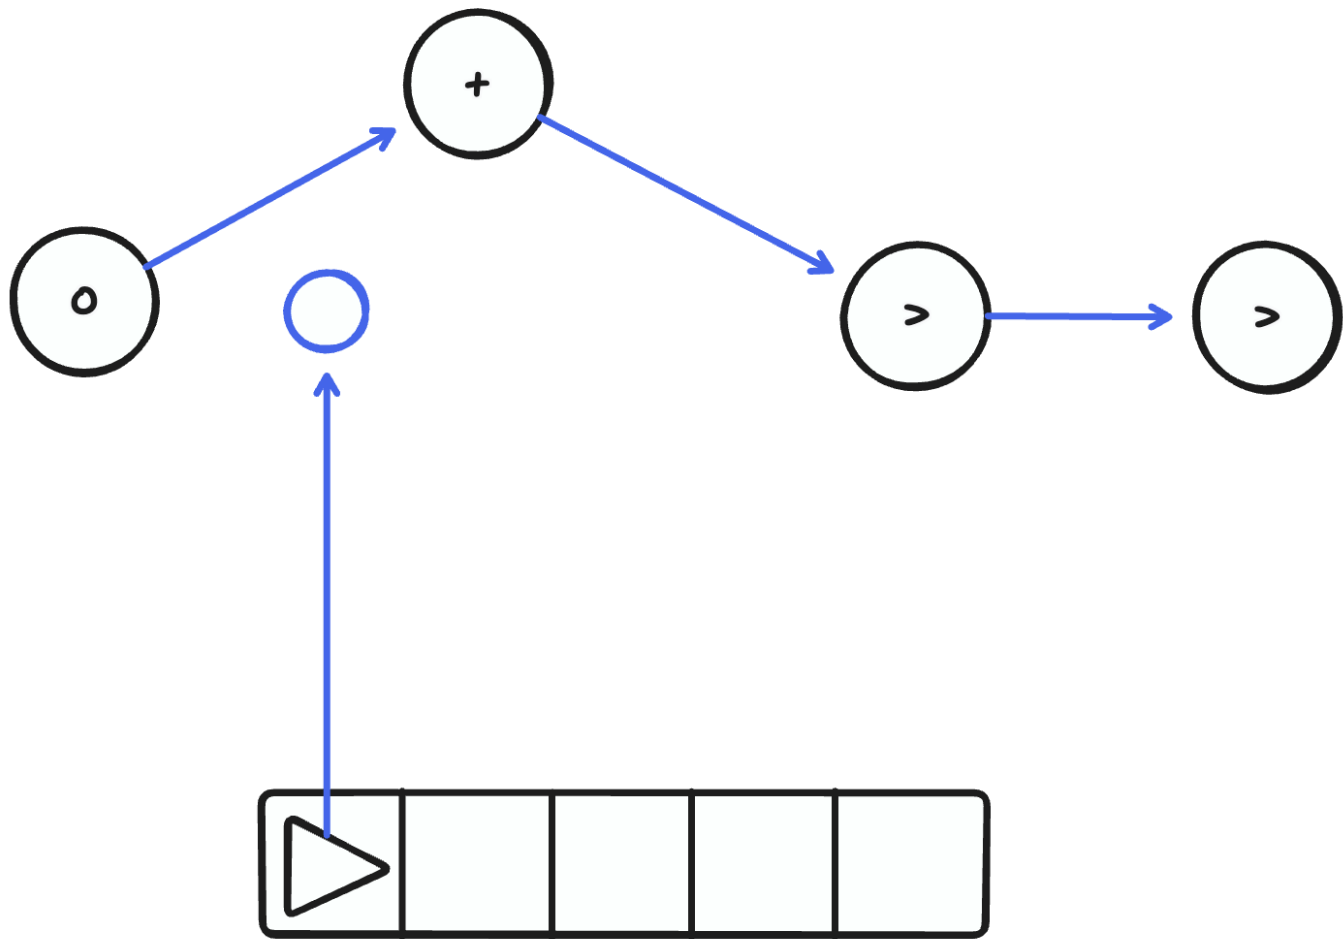

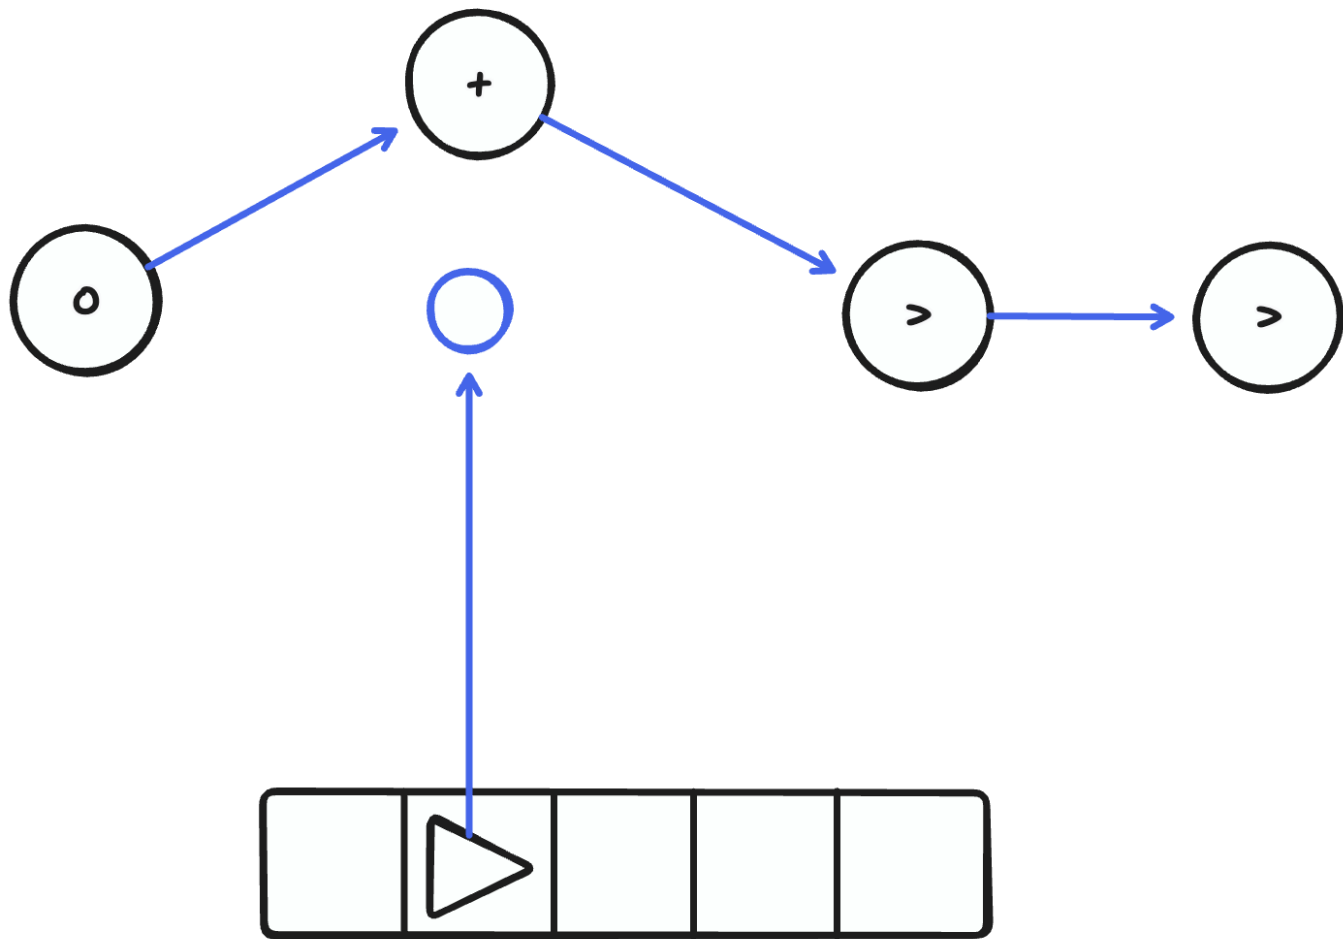

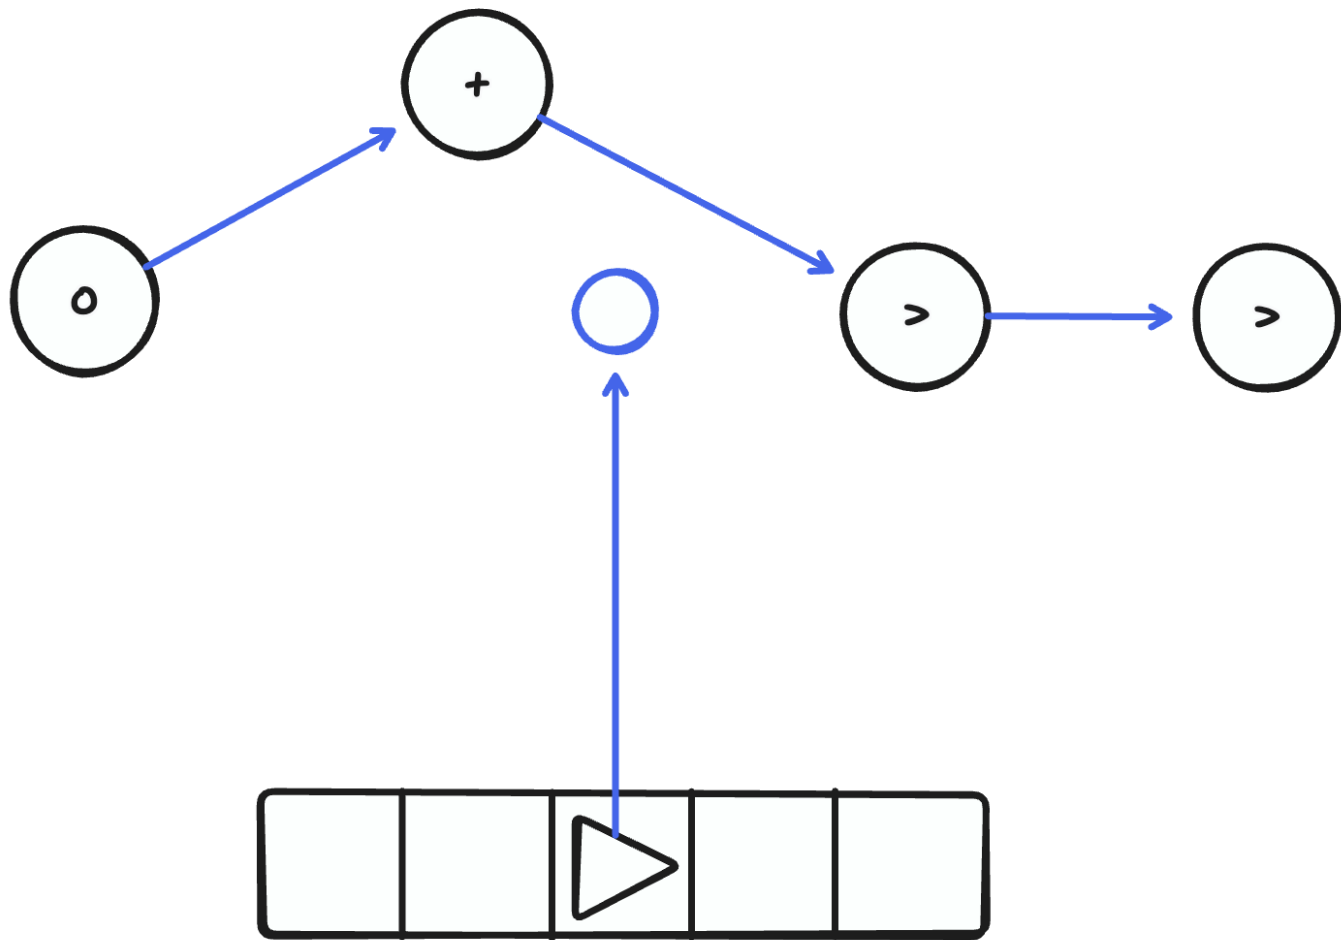

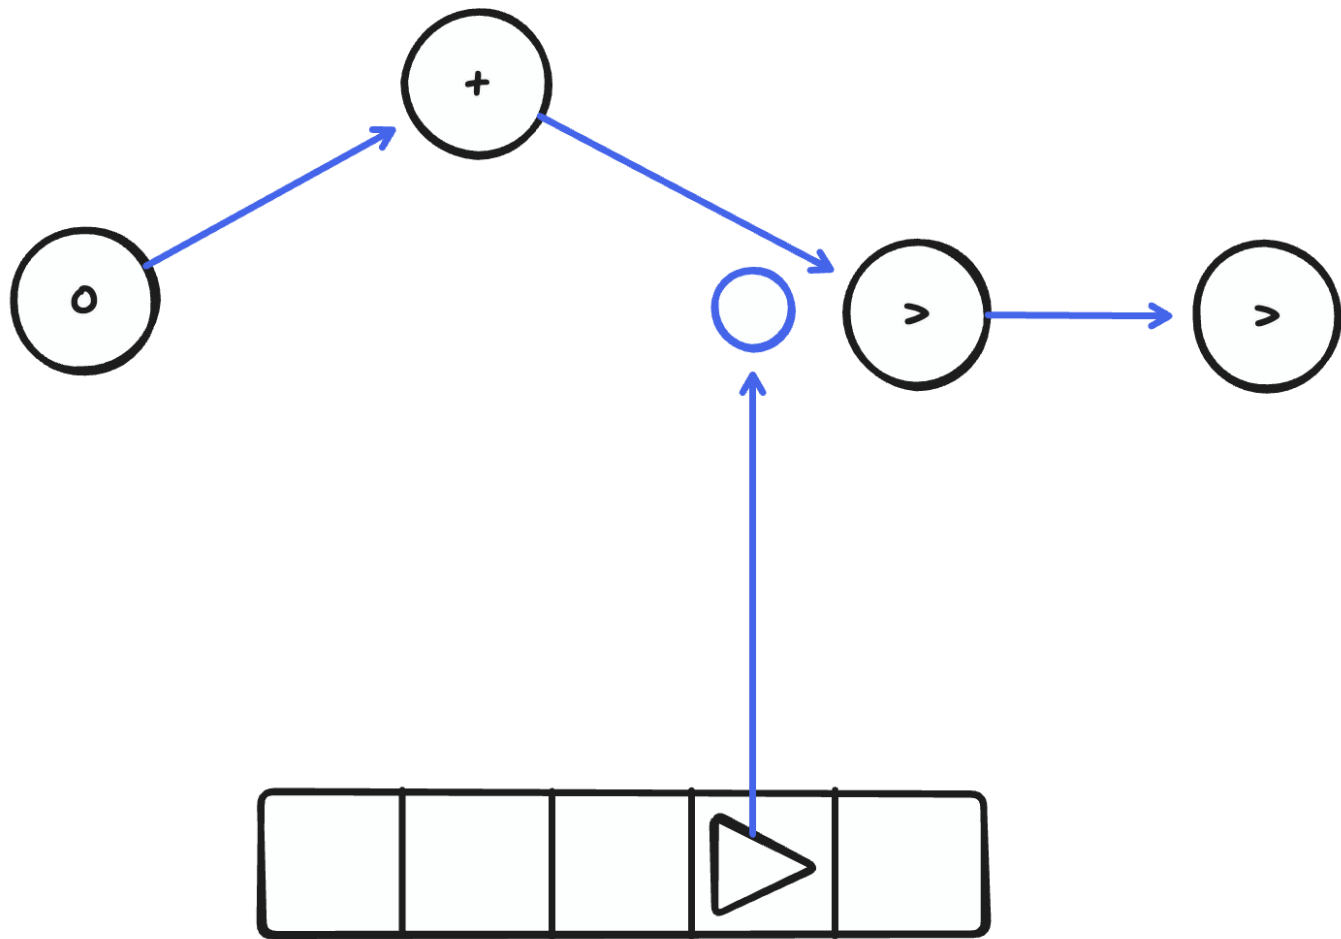

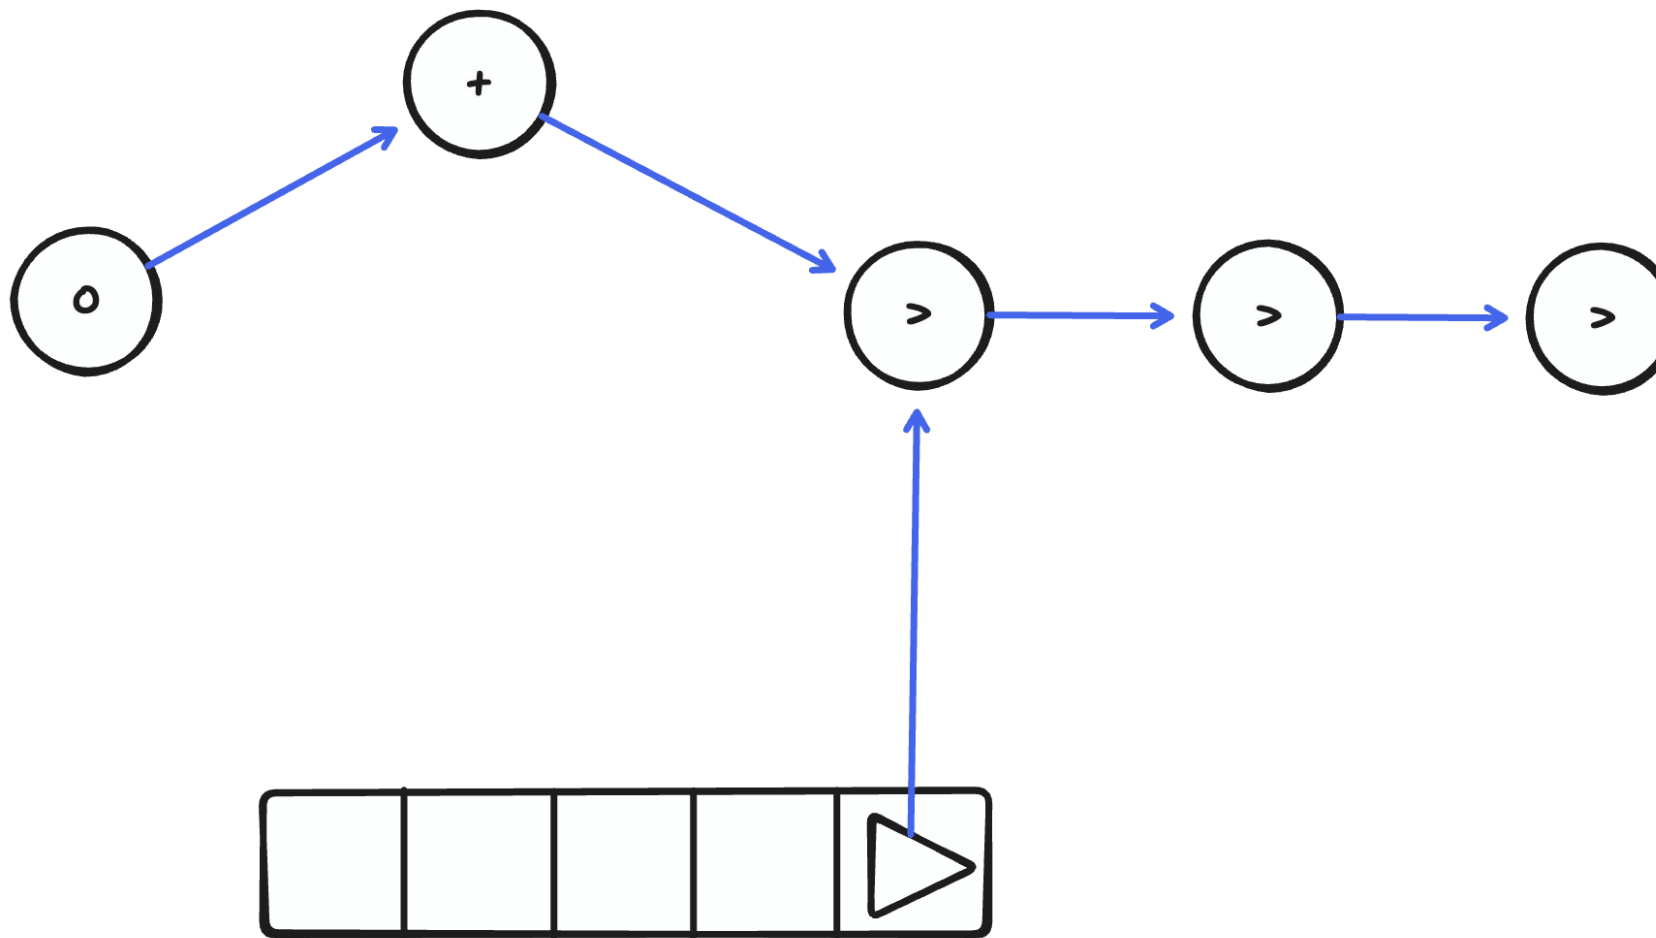

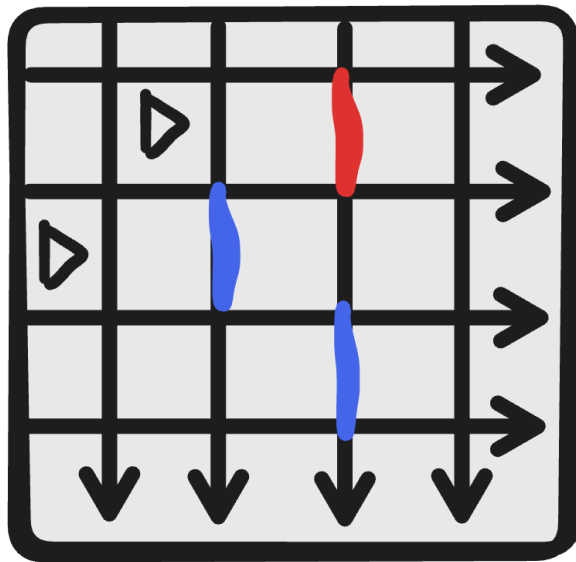

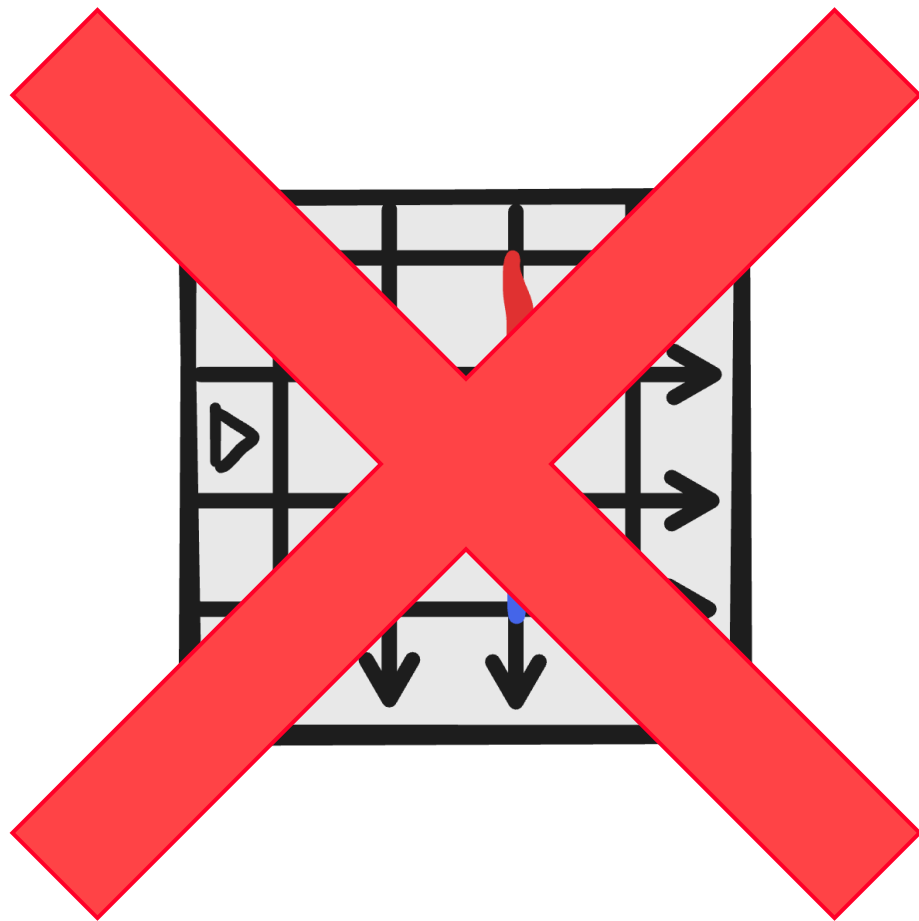

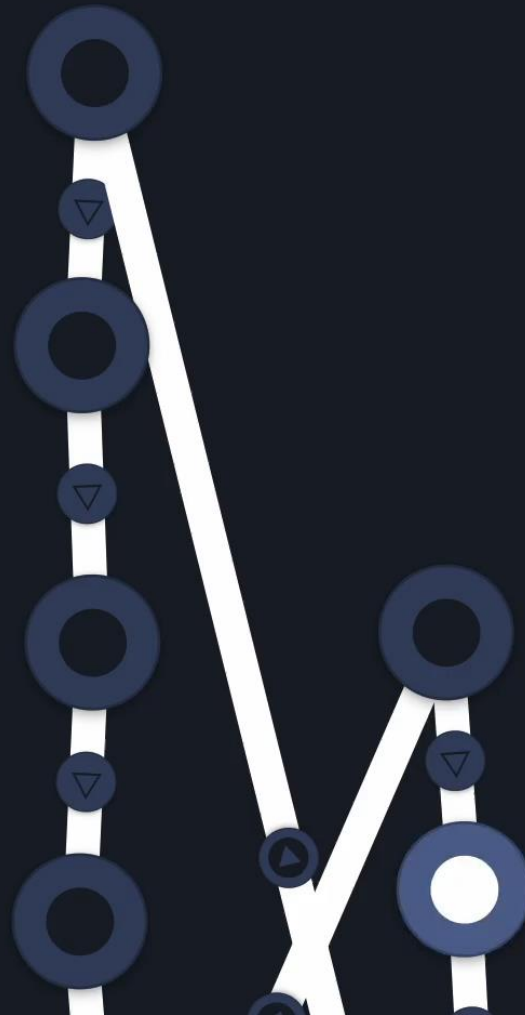

3 MONTHS

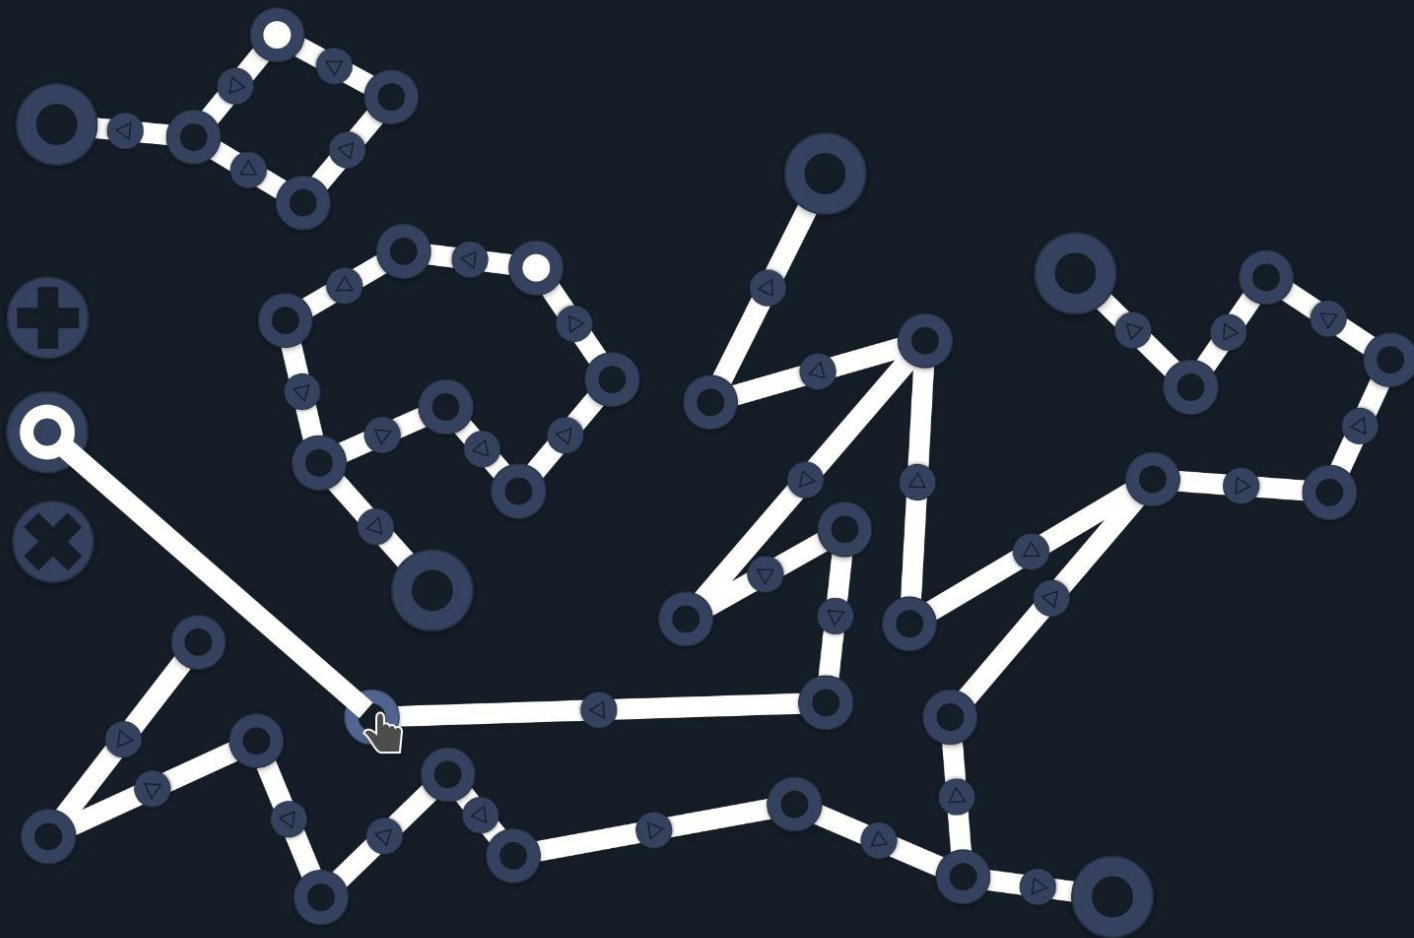

A low-angle, upward-looking shot of a dense forest of bare trees. The tree trunks and branches are dark and intricate, creating a complex web against a lighter, hazy sky. The perspective makes the trees appear to converge towards the top of the frame. Overlaid on this image is the text "3 MONTHS" in a large, white, sans-serif font. The text is positioned horizontally across the middle of the image, with the "3" being particularly large and prominent on the left side.

ARROOST: UNBLOCKING CREATION WITH FRIENDS

Last edited 7th July 2024

Abstract

Live programming is uniquely suited to **creative work**. It can remove many of the creative **blockers** that individuals experience when trying to produce it. But we could place much more explicit emphasis on the removal of **emotional blockers** from the creative process, as opposed to only focusing on **intellectual blockers**. Arroost is a project that seeks to do that — an experimental live programming tool for making music.

good is not enough

@olav@fosstodon.org

ben guo
@0thernet

inspired by the inimitable @TodePond sharing this scrappy fiddle:

I guess it's what @TodePond would call a scrappy fiddle, I'm happy I'm at the point where I can throw something together like this in an hour.

wait, is this a scrappy fiddle?

poga

@poga@g0v.social

In the spirit of sharing scrappy fiddles (thanks @TodePond 🐸)

自從放下寫文章需要完整清楚，擁抱 scrappy fiddle 後，寫 blog 輕鬆多了

Philippa Marko

@unkai@merve

Owner

I am really liking these! I'm still thinking about it though. It sounds really weird, but these look really **good**, and I'm wondering how that will change the perception of the tool. There's something freeing about using something that looks crappy 🤔

OBS 29.0.2 (mac) - Profile: Untitled - Scenes: Untitled

The screenshot displays the OBS Studio interface. The main preview window shows a nested instance of the same OBS window. The interface is divided into several sections: a top bar with the title 'OBS 29.0.2 (mac) - Profile: Untitled - Scenes: Untitled', a left sidebar with 'Scenes' and 'Sources', a bottom section with 'Audio Mixer', 'Scene Transitions', and 'Controls'. The 'Scenes' list includes 'Component Camera', 'Layout: Head Corner', 'Layout: Gif', 'INCLUDING ME', 'JUST MY PC' (selected), and 'test scene'. The 'Sources' list includes 'Audi', 'Vide', 'Disp', 'Vide', 'maci', and 'maci'. The 'Audio Mixer' shows 'Audio Input Capture' at 0.0 dB and 'Audio Input Capture 2' at -8.0 dB. The 'Scene Transitions' section shows 'Fade' with a duration of 300 ms. The 'Controls' section includes buttons for 'Start Streaming', 'Manage Broadcast', 'Start Recording', 'Start Virtual Camera', 'Studio Mode', and 'Settings'. The 'Start Recording' button is highlighted with a mouse cursor.

contributing

you can create an issue to get invited as a maintainer of this repo.

let's aim to be hierarchy free, so anyone is welcomed to change things they see fit.

let's not have a bdf1, or a small group of people having the last say.

let's not have hard rules to how we roll here. create a PR, or push directly to main.

this project has been born out of a jam session, so let's carry that ethos into the code behind the jam.

Developing Fragile & Unscalable Patterns with JOP

Jam -Oriented Programming

noughty fingers > personals > miscellaneous romance

second date??

Date: 2025-03-26, 7:00PM BST

ISO: honeys and cuties

it is apparent that after going swiping through all the dating apps that we need HONEYS and CUTIES to come wiggle and mingle over at SPANNERS, LONDON. We have such a great lineup of THE HOTTEST COMPUTER SCIENTISTS IN YOUR AREA. There will be lots of things happening, from live coded techo beats, performance art, a whole gang of pasta, uk bass, semi-intelligent dance music, and so much more.

plus there's a surprise :)))

The image shows a stage performance where a large screen displays a first-person shooter game. The game's HUD includes a health bar at the top left, a mini-map at the top right, and a central display showing the player's character in a white jacket and yellow helmet. The character is holding a weapon and is positioned in a dark, industrial environment. The stage is lit with blue and green lights, and several people are visible in the foreground, including a man in a green t-shirt and a man in a black t-shirt with 'LORD OF THE RINGS' text.

Algorithmic Pattern 2025

Your proposal: Pastagang: Jamming together far apart

Dear Pastagang

We are happy to accept your proposal “Pastagang: Jamming together far apart” to Algorithmic Pattern, aka Alpaca 2025!

We currently plan to include your proposal as a *Sheffield-based talk*. We are still confirming the schedule, but plan for Sheffield-based talks to take place on Fri 12th and Sat 13th September, and Online talks on Fri 19th and Sat 20th September.

The 'Sheffield-based talks' will all be hosted in-person in Sheffield, but will be streamed online.

COMMUNICATION

COMMUNICATION

(but not as you know it)

```
//=====
// Hello. If you've come here to re-enable paste, then please think carefully.
// Paste has been disabled as an experiment, to see if it affects various things.
//
// - Perhaps disabling paste can lower the overall quality and cleanliness of our code
//   ... which might help to lower standards, and encourage more people to make stuff.
//       It could help people to worry less, and "just type".
//
// - Paste allows people to force certain things to exist for a long time.
//   ... which can give too much power to keen individuals.
//       Let's disable paste for a while, to see if it encourages new trends to form.
//
// - Paste can be a crutch for me during learning.
//   ... I learn much better when I have to manually type things out.
//       Perhaps disabling paste can help me and others to learn better.
//
// - If paste is an option, we'll be tempted to build tools and languages that rely on it.
//   ... I think we should build tools that are optimised for manual typing.
//
// - By disabling paste, we prioritise being in the moment, and creating with others in the open.
//=====
addEventListener(
  //~~~~~
  // Try keeping paste disabled in your algorave!
  // Set yourself free. The results may surprise you.
  //
  // https://www.youtube.com/watch?v=mKE-aMVR0E4
  //~~~~~
  'paste',
```

pastagang blog

“performance” in pasta gang

no I’m not talking about “performing”

I’m talking about “performance” as in... how fast things run on your laptop or phone.

unstructured-thoughts

CHAU 17/09/2026, 12:58

Algorave Decelerate

- An incredible night
- Great music, visuals, atmosphere, huge turnout, the place was amazing
- Stamping people was fun
- Very hot, sweaty, humid
- Everybody's set was so good
- Love the concept of having an anti-tech bro narrative, but it was so good

JoeyJoeyJoe 17/09/2026, 13:32

- Super happy to see everyone again!
- It was really hot in there!!
- My thumb has dislocated for some reason...?
- Thanks @alex @heavy-lifting for constantly debugging the av equipment all night!
- Super shocked by the infinity bpm set 🤖 by @TodePond (Lu) @Jane @perambulator
- omg @nadya just keep evolving and evolving
- @Syntel8 & Mags improvisation during the interval was brilliant! And there was someone (sorry I didn't fail to catch the name) who used their phone to sample those sounds and

alex 18/09/2026, 20:17

A bit of time to collect some unstructured thoughts

- It was interesting having some people (maybe 10?) from the textile conference at the 'rave. I heard about a lovely moment when a professor of fashion and technology unexpectedly found himself giving crochet tips to a live coder on the dance floor
- Laura seemed to get a lot out of VJing with AdaCAD, from the discussions that followed I think this intersection between textile and live coding tech will bear a lot of fruit.. she was amused when someone was asking what it was and then said it wasn't for them because they were a luddite
- It was pretty hectic to run, not sure if it was fun but it felt meaningful which is more important! and feels fun in retrospect
- Not sure if I'd suggest doing another deceleration the same (maybe at the end of alnara??)

nadya 17/09/2026, 10:02

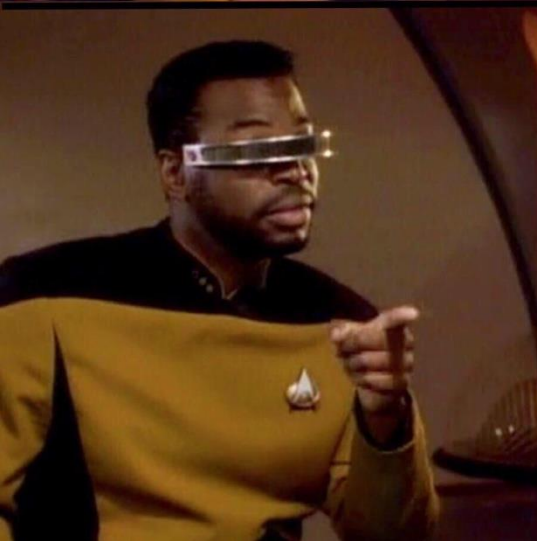

unstructured thoughts

- oh my god that was incredible
- i loved the juxy robot soooo much
- infinity bpm was epic
- there was a really cool transition between mags and started.
- joey showed me how to do breakcore drums from w algorave and it literally saved me

i donate my unstructured thoughts to the scenius

don't be afraid to let code die

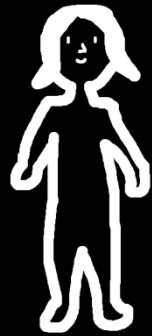

A person stands in a dark room, facing a large screen. The screen displays the text "Here lies nlel" and "2024 - 20". The person is wearing a dark shirt, light shorts, and has their arms raised. A green laser line forms a rectangular frame around the person and the screen. The person's head is highlighted with a red and pink glow.

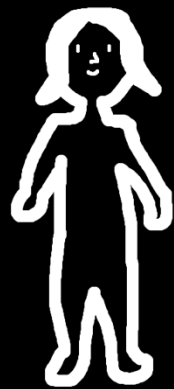

Here lies nlel
